Storage

GHA sells all of the leading storage technologies and solutions from all of the leading storage manufacturers. We can pre-configure and stage these solutions to your exacting specifications.

GHA's line of storage products also includes what your business needs in order to remain compliant with national laws and regulations. Without the proper precautions to secure, archive and protect certain types of data, you and your business can become liable in cases where negligence causes damage or loss.

When it comes to disaster recovery it pays to be proactive. Reactive is too late. Please let GHA Technologies help you protect your vital business data and give you a quote today for a disaster recovery solution. Here are some of our top sellers:

“Digital Shredding” from EDT

A robust, portable IT appliance is the most comprehensive tool for sanitizing hard drives. Forty-five minutes is all it takes to eradicate the drive's data beyond forensic reconstruction. A certifiable audit trail clearly indicates that you retain absolute care, custody and control of the process.

Data Recovery Services from Seagate and Salvage Data:

“SalvageData Recovery Service Lab, the first and only U.S. based ISO Certified data salvaging and recovery service company offer solutions to help you and your customers salvage and recover lost, inaccessible data from nearly all digital media storage types and operating systems regardless of the cause of data loss. Chances are, SalvageData labs can even salvage your customers' unrecoverable data!”

USB Drives

The IronKey is the world’s most secure USB flash drive, and it has been widely heralded in the press and by customers for its unique combination of security and performance.

The IronKey is provisioned at the factory with a 2,048 bit RSA Device Key which is used to authenticate the device and encrypt all communications between the server and the device. The key resides on the Cryptochip and is not accessible. This protects the IronKey against on-the-wire attacks or attempts to access/guess the device.

The device destroys all data after 10 incorrect password attempts.

IronKey’s patent pending “self destruct” methodology incorporates an exhaustive hardware erase of all flash and Cryptochip memory. This is a secure overwriting of data done in a hardware application for the ultimate protection.

The IronKey is both waterproof and tamperproof and has been through rigorous durability testing.

The IronKey also comes with a secure browsing technology which uses a private network to establish a secure connection between the device and the internet.

1g – 2g – 4g capacities available

Build to Order USB Flash Drives!

New USB Flash Drive-Permanent logo design. The logo is printed underneath a clear lens and is then fitted onto the drive, protecting the print from any accidental scratching.

Sizes available:

128MB - 256MB - 512MB - 1GB and 2GB*

*call to ask for larger sizes

The Viceroy – USB Pen Drive

The Viceroy USB Flash Drive pen is a multi functional USB 2.0 flash drive designed with the business executive in mind.

Fine writing instrument wrapped around a state-of-the-art USB Flash Drive

- Available in two colors: Blue and Black
- Capacities of 128MB – 256MB – and 512MB*
- Includes an ink refill and is individually packaged
- Presentation box available upon request
- Call to ask for larger sizes

Disk Duplication

Utilizing a disk or USB duplicator in your office or home can tremendously reduce your paper and toner usage along with the waste associated with printing and file storage. Each solution also provides a method of back-up capability to protect your valuable data and the convenience of transportability.

(USB Duplicator from Aleratec)

Disk Duplication Cost Savings Worksheet

Present catalog printing expense	\$ _____	Proposed disk or USB duplicator	\$ _____
Present cost for postage expense	\$ _____	Proposed media cost	\$ _____
		Proposed media mailing expense	\$ _____
		Total Monthly Savings	\$ _____
		Total Annual Savings	\$ _____
		Total Three Year Savings	\$ _____

By simply answering these simple financial questions you will quickly be able to calculate your return on investment, which will typically range from a minimum of 25% to 500% cost savings.

Save big money on paper, toner, filing, and monthly fees for archiving and go green by converting old paper into electronic documents!

Who is handling YOUR documents

Proper handling of sensitive documents and materials is essential for the security and privacy of your customers and employees. When the service is outsourced can you really be sure that the information is being handled appropriately? Allow GHA to show you the benefits of going paperless with document scanning and storage solutions from Fujitsu. Save **BIG MONEY** on paper, toner and filing expenses while you ensure the security of your company's sensitive information internally. See the following page for more product information.

Let GHA and Fujitsu show you a state-of-the-art document archiving solution!

There is a problem confronting business professionals in the office today. Valuable information that is written, printed, copied, and faxed - driving much of our productivity - is kept in piles on our desk, stuffed in folders in our file cabinets, or hidden away in locations around the office. Our paper-based information resources are not being managed in a way that can improve individual productivity or document security. This inevitably results in increased operating costs, diminished productivity, and in some cases, lost opportunity.

Fujitsu fi-6230 Sheet-Fed Scanner

Enhanced with innovative features, the Fujitsu fi-6230 scanner conserves both space and budget with its outstanding price-performance value and small footprint.

- **Fast, 40ppm / 80ipm scanning in monochrome and grayscale**
- **Exceptional 300 dpi color scanning at 30ppm / 60ipm**
- **Advanced paper handling technology for ultimate feeding reliability**
- **Robust 50-page Automatic Document Feeder (ADF)**
- **Comes with Kofax® VRS® Professional, Adobe® Acrobat® 8 Standard**
- **One-year Limited Warranty with available Advance Exchange program**

ETERNUS2000 Storage Solution

The ETERNUS2000 M200 delivers enterprise-class functionality, power efficiency and high availability in a quiet compact 2U cost effective mid-range storage offering.

- **2U Enclosure supporting up to 12 drives**
- **Support for SAS (146 GB, 300 GB 15 K rpm) and Nearline SAS (500 GB, 750 GB, 1 TB 7.2 K rpm)**
- **Maximum drive support up to 72 drives**
- **Four 4 Gbps FC, 3 Gbs SAS or 1 Gbs iSCSI host connectivity**
- **RAID 0, 1, 10, 5 and 6**
- **Snapshot and local mirrors**
